

Transportation Asset Management Workshop

The Building Blocks of a Plan

Increasingly, state and federal agencies are looking towards asset management to ensure road and bridge funds are being spent effectively. Legislators and constituents alike are regarding asset management plans as an outward sign that road agencies are moving in the right direction, making the best use of funds, and being innovative in their decision making.

Engineers, planners, and city managers will be provided with all of the building blocks of an asset management plan in this course:

- An understanding pavement condition ratings
- An understanding network vs project management
- How to set goals and manage performance
- How to use simple models to develop a strategy
- How to predict future conditions

Instructor

Tim Colling, PhD, PE, is the director of the Center for Technology & Training (CTT). He has been with the CTT since 2002. His expertise and focus is in asset management and asset management systems. Colling is

a graduate of Michigan Technological University and a licensed professional engineer in both Michigan and Wisconsin.
