2018 Transportation Asset Management Conference

Dear Conference Guest,

“Sharing the Experience: Uniting Michigan with Asset Management”

The TAMC Conference Committee put together a broad spectrum of topics and we are very excited for this year’s event. You’ll hear presentations highlighting efforts in asset management including the 21st Century Regional Infrastructure Pilot Project, an international asset management expert, and local agency leaders share their experience in development of asset management plans. You’ll also receive enhanced reporting of Michigan’s 2017 road and bridge conditions as well as future forecasts of our transportation infrastructure.

We are thankful for the data that is collected annually on the conditions of our roads and bridges by our asset management partners at the Michigan Department of Transportation, cities, villages, county road agencies, Metropolitan Planning Organizations, and Regional Planning Organizations.

We look forward to your feedback from the conference to continually provide value in our efforts in asset management education.

Sincerely,

Joanna I. Johnson, Chair
Transportation Asset Management Council
