

# ***Inventory-Based Rating System™ for Gravel Roads***

1

## **Agenda**

- Why rate roads?
- Why rate gravel roads?
- Why use the IBR System™?
- IBR System™
- Rating exercises

2

## Why Rate Roads?

*Why  
Rate  
Roads?*

3

## Why Rate Roads?

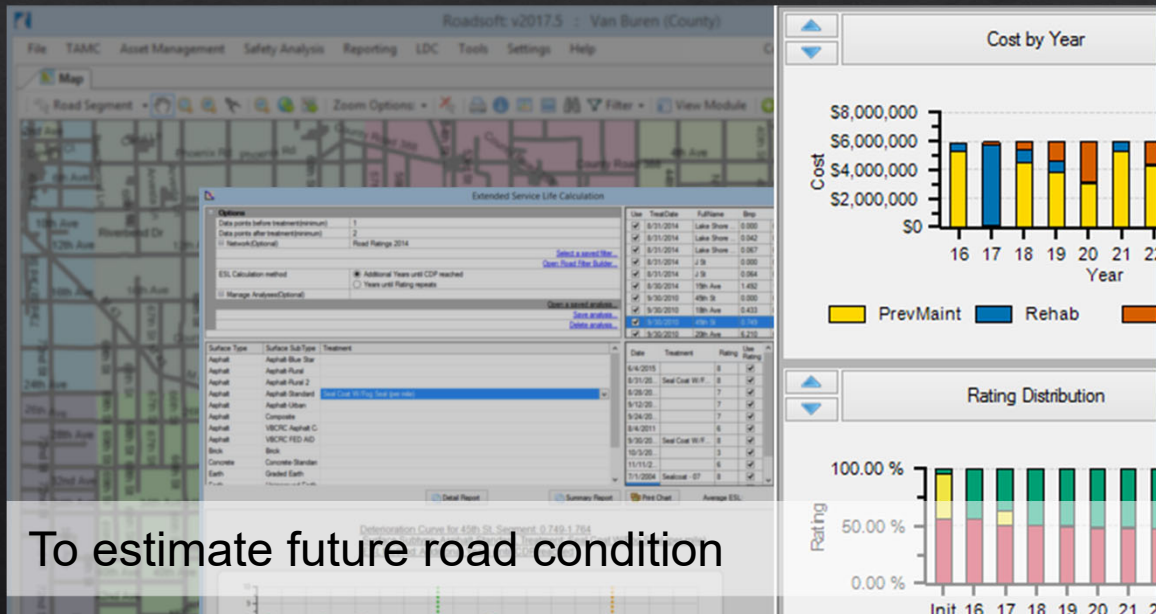

To see how road condition is changing

4

## Why Rate Roads?

5

## Why Rate Roads?

6

## Why Rate Roads?

To determine what/where/when improvements are needed

7

## Why Rate Roads?

To submit data to the TAMC

8

## Why Rate Roads?

All public roads in Michigan will be managed using the principles of asset management.

– Public Act 499 (2002) Summary

To submit data to the TAMC

9

## Why Rate Roads?

MDOT & local agencies must report to the TAMC the following:

- Road and bridge condition
- 3-year project plan
- Expenditures

– Public Act 199 (2007) Summary

To submit data to the TAMC

10

## Why Rate Roads?

Asset management plan for all roads, bridges, culverts and traffic signals required after October 1, 2020

– Public Act 325 (2018) Summary

To submit data to the TAMC

11

## What is the TAMC?

A supporter of excellence in managing Michigan's transportation assets by:

- developing a pavement management system
- advising the Michigan Infrastructure Council, the State Transportation Commission, and the Legislature

Michigan  
Transportation Asset  
Management Council

12

## What is the TAMC?

A supporter of excellence in managing Michigan's transportation assets by:

- promoting asset management principles
- promoting tools and practices for road-owning agencies

Michigan  
Transportation Asset  
Management Council

13

## TAMC Annual Report to the Legislature

14

## TAMC Annual Report to the Legislature

### Miles of Gravel Roads IBR Ratings

2018-2022

Figure 9

Source: 2018-2022 IBR Data Collection

15

## Reporting Data: Tale of Two Data Collections

TAMC federal-aid data collection

Non-federal-aid data collection

- agency decides what to collect
- agency must get approval first to be eligible for reimbursement
- agency rater does agency's own roads

16

## Why Rate *Gravel* Roads?

*Why Rate  
Gravel  
Roads*

17

## Why Rate *Gravel* Roads?

Gravel roads comprise half of non-fed-aid network\*  
(33% of entire Michigan road network)

\*Source: Transportation Asset Management Council; Michigan's Roads & Bridges 2013 Annual Report

18

## Why Rate *Gravel* Roads?

Show investments on unpaved network

19

## Why Rate *Gravel* Roads?

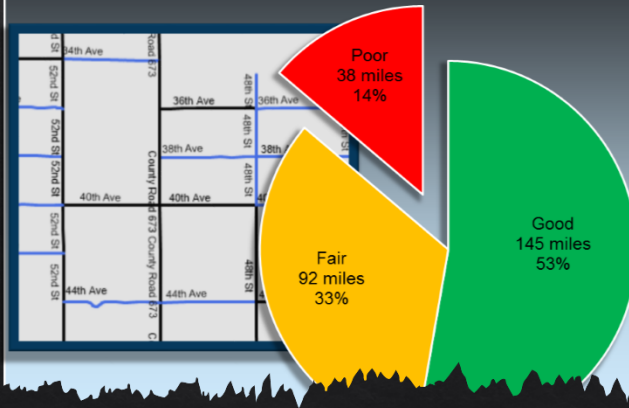

Aid in planning where upgrades are needed

20

## Why Rate Gravel Roads?

38 miles of our County gravel roads need drainage improvements

### Why Better Drainage?

Without proper drainage roads will fail quicker, Lorem ipsum dolor sit amet, duo in diam nonumes incorrupte. Sed id dicamo cu, an nullam lucilius has.. Vix id propriae electram liberavisse, stet tota cu vel. No adhuc placerat eloquentiam his, wisi definitiones in eos, eu dico animal admodum mel.

Ad rebum idque pri, has an probatus efficiendi. Cum te appareat adipiscing. Vis fierent scripserit in, ipsum detraxit cu pri, iusto omittantur mei ex. Magna accusan petentium qui ut.

Communicate to the public

21

## Why Use the IBR System™?

22

## Why Use the IBR System for Unpaved Roads?

Other systems have:

- frequent data collection needs
- unstable network-level measurements

23

## Why Use the IBR System for Unpaved Roads?

Other systems:

- Focus heavily on surface distress
- Disregard other important factors

24

## Why Use the IBR System for Unpaved Roads?

Other systems:

- are not directly related to change in value or usability of the asset

25

Example Road Segment

### Inventory Based Rating System Pilot Data Collection and Implementation Report

December 8, 2015

#### Authors:

Tim Colling, PhD., PE

John Kiefer, PE

Pete Torola, PE

29

## Why Use the IBR System for Unpaved Roads?

With the IBR System™, all roads don't  
have to be "good"

30

## IBR System™ for Unpaved Roads

# IBR System™

31

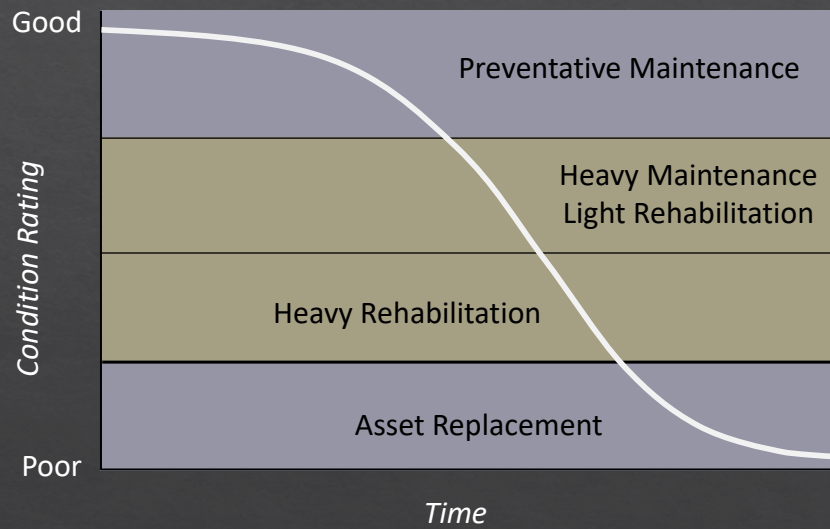

## Paved Roads Use PASER

32

## PASER

PASER can be used as a treatment selection tool

33

## Unpaved Roads Use IBR System™

34

## PASER versus IBR System™

IBR System™ is not a treatment selection tool

35

## Preparing for Rating

36

## Preparing for Rating

Rating Team  
Road Owner  
RPO/MPO

37

## Preparing for Rating: Understanding the Data Collection Policy

All rating team members must have attended:

1. PASER - trained or certified in 2021, 2022, 2023, or 2024
2. IBR training - every 3 years

See the TAMC Data Collection Policy for more details:

[www.michigan.gov/mic/tamc](http://www.michigan.gov/mic/tamc)

TAMC Policies

MDOT\_TAMC@Michigan.gov

40

## Preparing for Rating: Start & End Dates

**START:** First Monday of April

Weather permitting

**END:** First Friday of December

Last day to collect

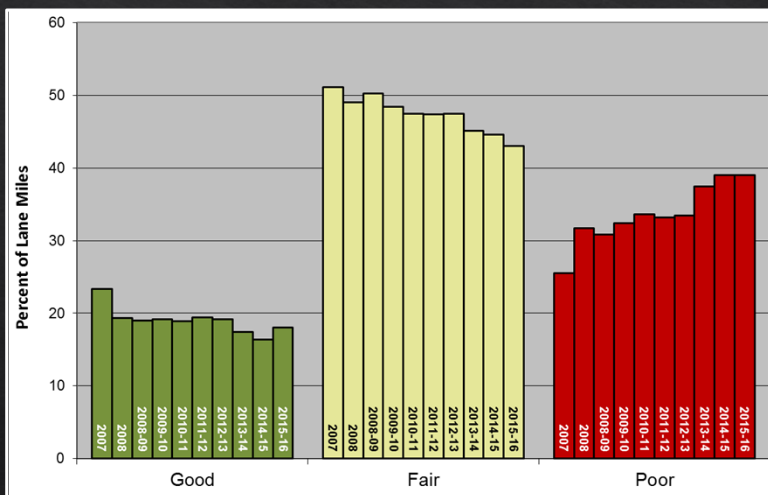

**SUBMISSION:** Second Friday of December

Last day RPO/MPO to submit to CSS

41

## IBR System™ Goals

To provide a network-level performance metric like paved roads

Chesbro: Transportation Asset Management Council 22 Jan 2017

42

## Measured Elements (or Features)...

Surface Width

Drainage Adequacy

Structural Adequacy

43

## Measured Elements Receive an Assessment...

Surface Width

Drainage Adequacy

Structural Adequacy

44

## ...based on a Baseline Condition...

Baseline—or “good”—condition determined by characteristics considered acceptable by most road users

45

## ...to Generate an IBR Number

Width	Drain	Struc	IBR #
Good	Good	Good	10*
Good	Good	Good	9
Good	Good	Fair	8
Good	Good	Poor	7
Good	Fair	Good	9
Good	Fair	Fair	8
Good	Fair	Poor	6
Good	Poor	Good	7
Good	Poor	Fair	6
Good	Poor	Poor	5

48

## IBR Number: Roadsoft/LDC Tools

Laptop Data Collector

*\* use latest versions*

49

## IBR Number: Roadsoft/LDC Tools

1 to 9 IBR number is generated by Roadsoft

The screenshot displays the Roadsoft software interface for managing IBR (Inventory Based Rating) data. The central form shows the following details:

- Segment Name:** 3.005 - 4.009 (5301 ft.)
- PR#23106 - S 2nd St**
- Surface Subtype:** Gravel-Standard
- Width:** Good, Fair, Poor (Fair is selected)
- Drainage:** Good, Fair, Poor (Fair is selected)
- Structure:** Good, Fair, Poor (Fair is selected)
- IBR Rating:** 5

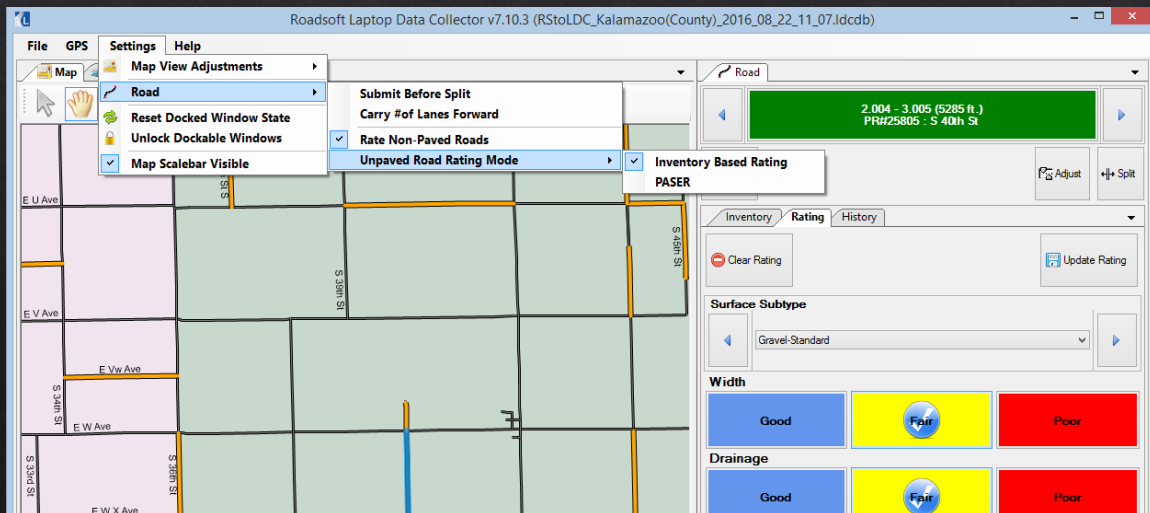

The right-hand pane shows a table of segments on S 40th St:

Selected	BMP	EMP	From	To	Length	
<input checked="" type="checkbox"/>	0.000	0.501	Z	E Y Z Ave	0.501 (2640 ft.)	
<input type="checkbox"/>	0.501	1.001	E Y Z Ave	X	0.500 (2640 ft.)	
<input type="checkbox"/>	1.001	1.002	[Undescribed Rating Segment Split]		Y	0.001 (5 ft.)
<input type="checkbox"/>	1.002	1.003	Y	E Y Ave	0.001 (5 ft.)	
<input type="checkbox"/>	1.003	2.004	E Y Ave	E X Ave	1.001 (5285 ft.)	
<input type="checkbox"/>	2.004	3.005	E X Ave	E W Ave	1.001 (5285 ft.)	
<input type="checkbox"/>	3.005	3.255	E W Ave	Attribute Change	0.250 (1320 ft.)	
<input type="checkbox"/>	3.255	3.275	Attribute Change		0.020 (106 ft.)	

The bottom right pane shows the **Inventory Based Rating (IBR) History** and **PASER Rating/Treatment History** sections.

50

## IBR Number: LDC's IBR Mode

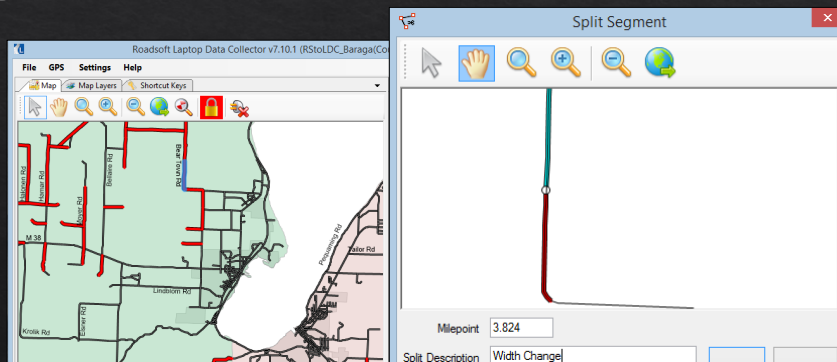

51

## IBR System™ Assessment Guidance

Unpaved roads can be highly variable so base your assessment on the overall segment

Break the segment if you have a definitive change

Segments should not be smaller than 0.25 miles

52

## Surface Width Assessment

**Good**

22 feet

**Fair**

16 to 21 feet

**Poor**

15 feet or less

53

## Surface Width Assessment

**Good**

22 feet

**Fair**

16 to 21 feet

**Poor**

15 feet or less

54

## Surface Width Assessment

**Good**

22 feet

**Fair**

16 to 21 feet

**Poor**

15 feet or less

55

## Surface Width Assessment

**Good**

22 feet

**Fair**

16 to 21 feet

**Poor**

15 feet or less

62

## Drainage Adequacy Rating Tips

63

## Structural Adequacy Assessment

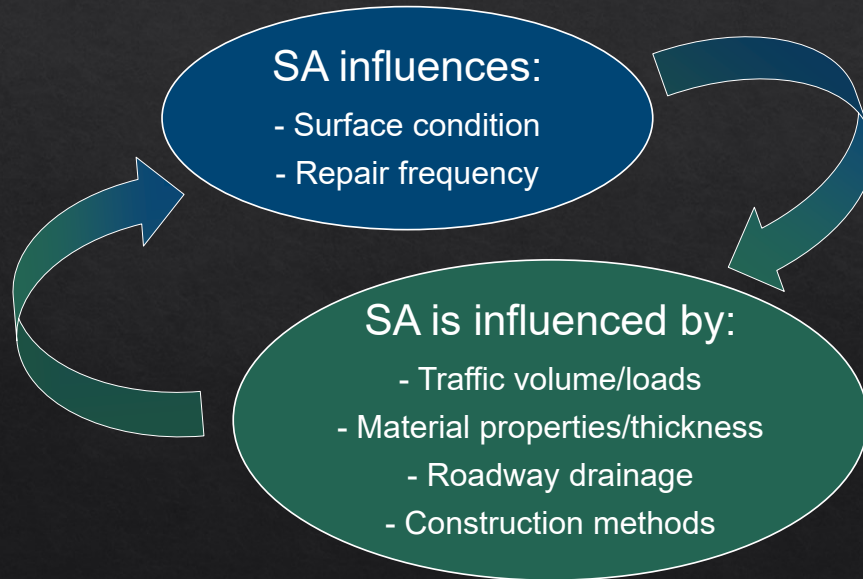

<b>Good</b>	> 7 inches gravel
<b>Fair</b>	4-7 inches gravel
<b>Poor</b>	< 4 inches gravel

64

## Structural Adequacy Cycle of Life

65

## Structural Adequacy Assessment

<b>Good</b>	> 7 inches gravel
<b>Fair</b>	4-7 inches gravel
<b>Poor</b>	< 4 inches gravel

Relative Quality of Roadbed Soil	Traffic Level		
	Low	Medium	High
<b>Very Good</b>	6"	11"	15"
<b>Good</b>	7"	12"	17"
<b>Fair</b>	7"	12"	17"
<b>Poor</b>	9"	*	*
<b>Very Poor</b>	10"	*	*

\* Higher type pavement design recommended

*U.S. Climatic Region III recommended aggregate base thickness from the AASHTO Design Catalogs given in the Gravel Roads Maintenance and Design Manual*

66

## Structural Adequacy Rating Tips

67

## Structural Adequacy Assessment: What if Thickness is Unknown?

68

## Structural Adequacy Assessment: What if Thickness is Unknown?

No extensive field investigation

69

## Structural Adequacy Assessment: What if Thickness is Unknown?

Rely on institutional/local agency knowledge

70

## Structural Adequacy: If Thickness is Still NOT Known...

71

## Structural Adequacy: If Thickness is NOT Known

Rate during the thaw breakup or after a prolonged rain event

Did not develop during the year

Good

During thaw or very wet period

Fair

During most of the year

Poor

72

## Rating Exercises
